Cashless Systems

For Business & Industry

One Card

Turn your existing employee ID badge
into an employee benefit.

OdysseyPCS™

Cashless Convenience with Odyssey PCS™

The Odyssey PCS cashless card system from The CBORD Group, Inc., is designed to allow corporate facilities to increase revenues, shorten lines, and improve overall service to their employees and visitors.

The Process - Odyssey PCS manages a network of Point of Sale (POS) terminals, vending card readers, as well as other card readers distributed throughout the site. When the ID badge is swiped Odyssey PCS determines whether the debit or payroll deduction is legitimate. If so, the transaction is processed and all pertinent accounts are updated in real time.

Why Cashless?

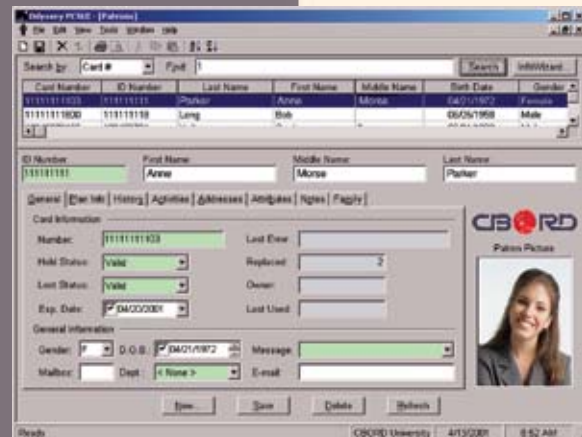

By implementing the cashless card system, your corporate facility can offer a one card solution using your existing employee ID badge for all transactions. This provides employee convenience and satisfaction, reduces administrative overhead, and generates valuable management reporting. This does not mean that you have to eliminate cash altogether, but the more transactions that are processed using the card the more efficiently your operation will run.

Employee Convenience - Employees have a one card solution using their existing employee ID badge for all transactions throughout their work day. The need to carry cash is eliminated.

Employee Satisfaction - Cashless transactions speed up lines allowing employees to spend more time enjoying their breaks, while at the same time getting back to their customers sooner.

Reduced Administrative Overhead - Imagine spending less time on manual entries, counting cash, giving change, dealing with charge slips, and processing reports. Odyssey PCS offers a better audit trail for all of your transactions.

Reporting Capabilities - Odyssey PCS provides detailed reports for inventory analysis, account activity, and balances for all users. Reports give information to managers on important issues such as trends, sales, cashier activity, and much more.

Odyssey PCS Specifications

- Microsoft® Windows® application
- Scalable tiered architecture
- Self-tuning ODBC-compliant database
- TCP/IP communications
- Optional integrated video imaging
- A wide variety of interfaces
- Extensive administrative tools

System Equipment

Odyssey PCS is an integrated package of software and hardware designed to handle transactions across your entire site with the use of your existing employee ID badges.

MICROS® POS Workstation 4 (WS4) - A POS terminal that uses a Windows-based application that provides advanced touch screen features, powerful management tools, and comprehensive reporting capabilities. The WS4 blends the best in hardware technology with the latest in embedded operating systems.

- TC/IP communications
- Easy-to-read color touch screen
- High performance and reliability

Epic Card Reader - The Epic Card Reader is a dependable and affordable card reading terminal designed to handle a wide variety of uses. Whether you run a debit operation, traditional dining facility, retail store, or an activity location, Epic card readers can work for you.

- Four-line LCD display
- TC/IP communications
- Integrated network interface card
- Integrated thermal receipt printer

Odyssey PCS Vending - It's no secret that vending generates revenue by stimulating impulse sales. Add a vending reader and the potential for impulse sales increases significantly, because employees no longer need to have change or small bills handy to make their purchases.

- Snack and soda vending
- Improved auditing control
- Real-time record of transactions

ValuePort II - ValuePort II is a versatile "cash-to-account" station that provides cardholders with greater financial flexibility. They can deposit cash directly into their online debit account for use of their ID badge. Additionally, visitors can deposit money to receive a card to use during their visit.

- 24-hour cash-to-account access
- Integrated receipt printer to provide a transaction record
- High-security cabinet
- Account balance display

Webfood® - Why wait in line? Order online. Webfood Online Ordering Service is an Internet-based dining application designed to improve the service quality, efficiency, and ultimately the profitability of foodservice operations.

- Increase your production capacity and revenue
- Improve customer satisfaction
- Online and kiosk ordering
- Store customer profiles and "favorites"
- Perfect for third-shift employees
