

OdysseyOne™

How OdysseyOne works

The system host manages a network of POS terminals, vending machines, and card readers distributed throughout your facility. The host constantly processes transactions and requests for information over this network.

When a cardholder's ID is presented, the host determines whether the debit or payroll deduction is legitimate. If it is, the transaction is executed and all pertinent accounts are updated. The entire transaction takes place within seconds.

OdysseyOne™

For Business and Industry

OdysseyOne Benefits

- Accelerate Cafeteria Lines - Cashless payroll deduction
- Build Employee Satisfaction - One card for all services
- Reduce Overhead - Spend less time on manual entries, counting, and reconciling cash and charge slips
- Sharpen Perceptions - Detailed reports for forecasting and checking account activity and balances easily

About OdysseyOne - Cashless System

OdysseyOne is a powerful Windows-based system that integrates all of your cashless activities & revenue-generating transactions onto one card over your network. Whether you need a one-card solution for foodservices or a comprehensive system that brings together many facilities and revenue centers, OdysseyOne can help.

OdysseyOne allows employees to use their ID badges for all services, including: cafeteria dining, vending machines, company store purchases, and many other options through easy payroll deduction or a prepaid declining balance.

Cashless payroll deduction keeps lines moving quickly, is simple to use, and makes tracking spending easy. It also provides valuable forecasting and data collection which allows management to better serve its employees.
